Lane Baker was educated at Missouri State University, Springfield, MO (BS Chem 1996) and Texas A&M University (Ph.D. 2001) working with Richard M. Crooks. He joined the group of Lloyd J. Whitman (2001) in the Surface Nanoscience and Sensor Technology Section of the Naval Research Laboratory as a National Research Council Postdoctoral Associate, conducting research on atomically resolved scanned probe microscopies. He then joined the group of Charles R. Martin (2004) at the University of Florida as a Postdoctoral Associate investigating polymeric nanopores for sensing and separations. He started as an Assistant Professor at Indiana University in the Analytical Chemistry Division (2006) and was promoted to Associate Professor with tenure in 2012, and to Professor in 2012. From 2014-2021, Baker held a James F. Jackson Chair in the Department of Chemistry at Indiana. In 2022, Baker moved to the Department of Chemistry at Texas A&M University with appointment as the inaugural holder of the Dr. Carl D. McAfee '90 Chair in Analytical Chemistry. His research group is broadly interested in electrochemistry with focus in the following areas. (i) Transient and spatial measurement of ion concentrations with scanned probe microscopies. (ii) Electrospray from nanoscale pipettes. (iii) Electrochemistry in small domains. (iv) High-throughput electrochemical measurement.
